2006 International 7400 4×4 UNICAT Expedition Truck

One-of-a-Kind · German Engineered · Built to Military Spec · Ready for Anywhere on Earth

78,225 Miles | April 2026

THE TRUCK

- 2006 International 7400 4×4 Extended Cab
- Military-spec MRAP chassis build
- Cab seats 5 with air-suspension seating
- Allison 3000 RDS 6-speed w/overdrive
- 4WD locking differential — driver controlled
- Transfer case: Meritor T-4210 2-speed
- Air brake ABS — Bendix 4-channel
- Exhaust brake — D Logic electronically activated
- 200-gallon fuel capacity (2 × 100-gal tanks)
- Manual tire inflation system
- Engine preheating — electric or Webasto
- 4-foot water crossing rated
- Hydraulic winches front & rear — synthetic cable
- Goodyear MV/T 395/85R20 on Hutchinson split rims
- ~29,000 lbs fully loaded · Snow chains included

POWER & ELECTRICAL

- Victron Quattro 5000W inverter/charger
- Fischer Panda 7kW diesel generator
- Solar: 875W — 5 panels with MPPT regulator
- 8 × Lithium 12V/1000Ah — 12kWh total
- Charge from shore, generator, solar, or engine simultaneously
- 2 × 30A shore connections (50A Y adapter)

LIVING QUARTERS — DUAL SYSTEMS

- 112 gallons fresh water (2 × 56-gal freeze-proof tanks)
- Black tank 15 gal | Gray tank 25 gal — both heated
- Hot water: diesel Webasto + electric heater
- Heating: diesel radiant + heat pump
- A/C: 2 roof units (battery + shore/gen)
- Kitchen: microwave, propane stove/oven, propane grill outlet
- Teak wood interior floors & table
- Alcantara upholstery — original
- Heated bed with Froli coil system
- Dual-pane windows with blackout shades
- Bathroom & shower with privacy closure
- Heated bathroom / clothes-drying rack

EXTERIOR STORAGE & CAPABILITY

- Stainless roof rack — sat com, LED work lights, 4× Hella 2100 HID
- Huge lockable stainless storage box with 3 shelves
- Stainless exterior cabinets
- PVC underbody tube storage + bumper sewer storage
- Rear fold-down stainless bumper / under-ride guard
- Airline L-track on roof and in garage
- ~2,000-mile operational range
- Front scooter rack w/powered lift + Tomas moped included
- Tow hitch front & rear | Trailer air-brake support

Major Upgrades Include: Electrical system upgrade ($21K) · New A/C (front & back) · New refrigerators (2) · MAXX fans · Self-aligning satellite dish · LED headlights, backup & work lights · Carplay audio · Cellular booster · GPS · Security cameras (3) · Remote exterior lighting · 3 safes · Tinted cab windows · Air ride assist front axle · New engine & generator batteries

Featured at SEMA 2006, the Baja 1000, Overland Expo, and Burning Man — and on CNNBusiness. Purchased from the original California owner in 2017, this UNICAT has been garage-kept and meticulously maintained. Includes all spare parts, system manuals, and everything needed to go anywhere.

Exterior — Built for Every Corner of the Earth

Las Vegas · Oregon Coast · Olympic Mtns · Yosemite · Death Valley · Moab · Grand Canyon · and beyond

Interior — Expedition Comfort. No Compromises.

Teak floors · Alcantara seating · Full kitchen · Dual fridge · Heated shower · Bathroom · Command center

ADDITIONAL INFORMATION

2006 International 7400 4×4 UNICAT Expedition Truck

The following details reflect our ownership experience, care standards, recent upgrades, and the full scope of systems and storage aboard this exceptional expedition vehicle.

■ ELECTRICAL CARE & MAINTENANCE PHILOSOPHY

We have always used a surge suppressor whenever hooking the UNICAT to electrical charging stations and kept it charged when not in use to maintain all the systems. It has also been **building-kept** when not in use. There is a separate charge point for the chassis batteries (2 AGM) to keep them maintained.

The **Victron inverter** has an onboard color display with remote Wi-Fi access. Each of the Lithium batteries contains an **internal battery management system** to prevent deep discharge.

■ EXTERIOR & MECHANICAL FEATURES

The truck includes roof access via an attached ladder and a manual chain hoist system for the spare tire and storage box, along with tire covers and storage under the back seats in the cab. Racor fuel prefilters with water separators and heaters are fitted throughout. Stainless steel wire mesh headlight brush and stone guards protect the front. The cab has been upgraded with leather and wood trim, additional insulation, and air suspension seating. All plumbing is insulated to prevent freezing.

■ SECURITY

The door to the UNICAT is a **triple-lock high-security** entry with a security pin tumbler mechanism specific to each individual unit. It also features a full pull-down screen door. A remote exterior security light system is operated via key fob when approaching the vehicle or via a bedroom remote inside the sleeping area.

■ UPGRADES, REPAIRS & ADDITIONS SINCE PURCHASE

There are always repairs to be made and things to be tweaked. We are focused people who want our vehicles top of the line and dialed in. The following original items have been upgraded or replaced since we took ownership:

Mechanical: All fluids were changed throughout the vehicle. The front differential, front cab bushings, and front axle seals were inspected and repaired as needed. The truck was leveled and aligned, the front axle upgraded to an Air Ride Assist with an adjustable regulator, the radiator flushed, and all generator coolant lines replaced.

Audio, Electronics & Connectivity (via Street Smart specialty shop): Both the front and rear TVs were replaced and all new UNICAT stickers and plates were installed. USB and HDMI ports were added to the cab along with an XM Antenna and Tuner. Interior lights were converted to LED and speakers in the cab were upgraded. A USB overhead port was added for an on-the-road camera.

■ INTERIOR FEATURES & STORAGE

There is a passage to the cab hatch with a security panel and sound insulation panel, along with incredible garage storage. The living space features a 2-deep by 4 storage container system (8 total heavy-duty totes) plus 10 additional bedroom storage areas, and a remarkable amount of storage throughout the kitchen and bathroom areas.

Outside there is a shower, and inside you have a closet with a safe and 3 shelves — we used it as our office space, but it can be converted back to a hanging clothes closet. The kitchen features a pull-up leaf that extends the countertop 3-plus feet, with locked storage under the dining seat. The table area can be converted to a couch or sleeping area either temporarily or permanently.
